Energy Today

Building performance Lab

BPL staff and research partners at the June 2015 meeting of the Sustainability Integrated Buildings and Vines Center, hosted by the City College of New York.

Founded in 2005, the mission of the CUNY Institute for Urban Systems Building Performance Lab is to advance high-performance building operations and practices in exiting commercial and public buildings. We focus on improving efficiency and optimizing building operations through:

- Continuing education programs for facility managers, building operators & energy professionals
- Building systems research & development
- Internships for CUNY students

Over the past decade, more than 75 students have been a part of our paid internship program, and we have trained more than 200 CUNY students in building systems and energy topics.

If you are interested in:

- Building operations and engineering
- Property management
- Energy services
- Information technology
- Urban sustainability

... then an internship at BPL may be right for you!

Prospective interns are invited to the fourth annual Energy Boot Camp, a three-day intensive workshop that is free and open to all CUNY students.

Energy Boot Camp 2016

Wednesday – Friday, June 8 – 10, 9 am – 4 pm
